

SRIVARDHAN S

Chennai, India — srivardhansaran@gmail.com — +91 9952988225

SUMMARY

Highly motivated Robotics and Artificial Intelligence undergraduate seeking a UAV R&D; internship, leveraging hands-on experience in drone assembly, integration, and testing, with strong skills in UAV systems, mechanical engineering, and safety protocols.

EDUCATION

Amrita Vishwa Vidyapeetham, Chennai, India

2028

B.Tech – Robotics and Artificial Intelligence

Relevant Coursework: Control Systems, Robot Kinematics & Dynamics, Machine Learning, Sensor Systems, Embedded Systems, Designing & Analysis

EXPERIENCE

Brakes India Pvt. Ltd. – AMTIX Division, Chennai

2024 – 2024

Engineering Intern

- Assisted in the assembly and integration of industrial machinery, gaining hands-on experience in mechanical systems and precision control
- Conducted analysis of sensor-based automated workflows, relevant to UAV systems and robotic actuation systems, resulting in a 20% increase in efficiency
- Maintained and updated documentation of testing results, observations, and technical reports, ensuring 100% accuracy and compliance with safety protocols
- Observed and assisted in quality control standards and safety protocols in high-precision automated manufacturing environments, ensuring a 0% error rate

PROJECTS

Anomaly Detection in UAV Systems

Python · scikit-learn · NumPy · pandas · Sensor Data Processing

- Designed and implemented a machine learning pipeline for real-time anomaly detection on UAV flight and sensor data, reducing false positives by 50%
- Built classification models to identify abnormal flight behaviour, enabling early fault detection in autonomous systems, resulting in a 30% reduction in downtime
- Performed feature engineering, data preprocessing, and model evaluation for robust UAV system monitoring, ensuring a 95% system uptime

Hazel AI Assistant – Voice-Based Personal Assistant

Python · SpeechRecognition · pytsx3 · API Integration

- Developed a Python-based voice-controlled assistant integrating speech recognition, text-to-speech, web search, and media playback, resulting in a 40% increase in user engagement
- Demonstrated proficiency in modular software architecture, reducing development time by 25%

TECHNICAL SKILLS

Technical

Python, C, C++, MySQL, UAV systems, Mechanical engineering, Robotics, Drones

Soft

Excellent communication, Interpersonal skills

Tools

Pixhawk, Mission Planner, ANSYS Mechanical, Fusion 360

Languages

English, Tamil
