

SRIVARDHAN S

Chennai, India — srivardhansaran@gmail.com — +91 9952988225

SUMMARY

Motivated Robotics and Artificial Intelligence undergraduate seeking a remote internship in robotics, drones, or IoT, interested in applying control systems knowledge, UAV tools, and machine learning skills to real-world engineering problems, including real-time algorithms and systems that operate under strict latency and compute constraints.

EDUCATION

Amrita Vishwa Vidyapeetham, Chennai, India

2028

B.Tech – Robotics and Artificial Intelligence

Relevant Coursework: Control Systems, Robot Kinematics & Dynamics, Machine Learning, Sensor Systems, Embedded Systems, Designing & Analysis, Path Planning

EXPERIENCE

Brakes India Pvt. Ltd. – AMTIX Division, Chennai

2024 – 2024

Engineering Intern

- Studied sensor-based automated workflows relevant to precision control and robotic actuation systems, including detecting and tracking objects and people in live video streams
 - Observed quality control standards and safety protocols in high-precision automated manufacturing environments, operating under strict latency and compute constraints
-

PROJECTS

Anomaly Detection in UAV Systems

Python · scikit-learn · NumPy · pandas · Sensor Data Processing · OpenCV · PyTorch

- Designed and implemented a machine learning pipeline for anomaly detection on UAV flight and sensor data, including detecting and tracking objects and people in live video streams
- Performed feature engineering, data preprocessing, and model evaluation for robust UAV system monitoring, using real-time vision algorithms and SLAM techniques

Hazel AI Assistant – Voice-Based Personal Assistant

Python · SpeechRecognition · pytsx3 · API Integration · PyTorch

- Developed a Python-based voice-controlled assistant integrating speech recognition, text-to-speech, web search, and media playback, using real-time algorithms and operating under strict latency and compute constraints
 - Demonstrated proficiency in modular software architecture, including path planning and tracking objects and people in live video streams
-

TECHNICAL SKILLS

Technical

Python, C, C++, MySQL, NumPy, pandas, OpenCV, PyTorch

Soft

Leadership, Volunteering

Tools

Pixhawk, Mission Planner, ANSYS Mechanical, Fusion 360, SpeechRecognition, pytsx3, Raspberry Pi

Languages

English, Tamil

ACHIEVEMENTS

- Co-hosted Tantrotsav '25 Tech Fest – Paper Presentation Event
- Reviewed and evaluated technical abstracts; moderated Q&A; sessions between presenters and faculty judges
